

# Data Analysis Assistance

- Onboarding new data sources to assist your immediate analysis needs
- Searching and Investigating in Splunk, it's our thing
- Available to increase capacity in your Splunk analytics environment when you need it the most
- Help with long term assistance beyond the initial need

## Need Experts to support data analysis in Splunk? We have them.

Even with a stable, business-as-usual Splunk environment, sometimes there are causes for additional data analysis. If this is something your team is looking for support on, or you are looking for an update from Splunk's experts on the latest best practices, the Data Analytics Assistance offering is right for you. Splunk Professional Services are available to assist your internal team or an external or partner company by augmenting your staff with Splunk search and investigate experts to increase your analysis capacity. The Splunk Professional Services team lives as breathes SPL (Splunk Programming Language) so we are able to quickly assist you in developing the queries that you need in order to investigate.

## Types of Analysis Available

Data identification • Data classification and categorization • Identifier extraction and correlation  
 Trend analysis • Population grouping • Geospatial mapping • Outlier analysis • Data Enrichment  
 Interactive visualization • Forecasting and Machine Learning • Regression analysis

## A Typical Week of Data Analysis

- **One day:** workshopping, requirements gathering
- **One day:** diving through and normalizing data
- **Two days:** building new analysis searches
- **One day:** polishing searches and dashboards
- **Along the way:** discussing best practices and knowledge transfer

**Not sure if the data you need is already in Splunk?** Don't worry, our team are experts at onboarding data. We can help you determine which data is the most critical to assist your investigation. Even if you are already a mature team using Splunk for business analysis, and you simply need more experts to converge on a particular event, Splunk has you covered here too. Let us sit with your experts and increase your capacity until you are ready to go back to normal operations.

## Assistance to Data Analysis

Splunk is not a data consulting company, but we make the world's leading machine data analysis software. We want our customers to know we are invested in your success and are standing by to assist your analytical needs where we can. Splunk Professional Services is available to support your needs with: Rapid drill down, pivoting, exploration, and classification of data, data onboarding, Splunk environment upgrades, expert search and investigation, and staff augmentation.
